Subject: Microsoft Settlement

Thank you in advance for reading this. The settlement that microsoft agrees to would only solidify their market share. Tendendancy to believe that something given is actually free, turns a blind eye from Microsoft's real intentions. Microsoft only wishes to stifle any real choice of future consumers by creating false trust and familiarity with Microsoft product.

Have Microsoft give the money ,otherwise spent in their own interests,to schools, who may then buy what the schools would benefit from, not Microsoft.

Please don't let Microsoft use this as an oportunity to their own gain.

My Opinion, Tim Conley
